“It is a fine seasoning for joy to think of those we love.”

Dear Srs. and benefactors,

WE WISH YOU A JOY FILLED CHRISTMAS
AND An ENRICHING NEW YEAR 2016.

The season of Advent and Christmas is a time of preparation to celebrate the divine Love. The eternal love is that fullness of God's manifestation came to be with us. God send His Son to share in our humanity so that we may experience divine love. In Jesus we experience God's revelation of Love. Jesus entrust His

mission of Love to us. We all are collaborators in His divine Mission. Jesus has shown us the Way we need to follow Him. You are effective collaborator of God's love. I am grateful to you for your encouragement and constant support to me and our community.

Life is full of challenges but your support gives me and my community courage to accept it. Your support has encouraged our staff to work wholeheartedly. Our dedication and God's blessings have enhanced the quality of life. Our patients are healthy and they have hope of living new life with dignity. This year we fruitfully executed our plans.

Our dream project was **efficient Laboratory** for our hospital. This laboratory has helped patients as well as doctors to provide quick remedy for their illness. Some of the experiences I had shared with you earlier.

LABORATORY FUNCTIONING WITH NEW SET UP:

As we have new laboratory we also purchased new accessories to make it effective and efficient. As you observe the new set up gives a scientific look to our hospital. It has added lot of facilities to our patients which help our doctors to give proper medication to the patients. Doctors and Patients are expressed their trust and confident in our lab reports. We thank you for entrusting us in this endeavor.

Our OPD: This financial year our OPD patients have gone up. Though there are many new hospitals coming in the villages. Most of the poor patients prefer our hospital. The statistics indicates that we are on good mission of promoting life. This year we had 61524 patients. In our wards we had admitted 11302. The Gynecology department is one of the best departments in Shevgaon vicinity. Thus we had 4607 deliveries this year. Surely, our statistics will boost your confidence in us.

NURSERY WARMER AND PHOTOTHERAPY MACHINE for the new born for their survival:

As we have good gynecology ward, we get a good number of patients. Very often we were forced to send the new born babies to another hospital for special treatment. Henceforth, they do not need to go another hospital; we have purchased few new machines. The babies have responded very positively. Our doctors and staff are happy to utilize these modern facilities.

CAMPUS SECURITY: Another mega dream is building the compound wall for the hospital and Nursing school. The compound wall is essential due to

security purpose. In the campus most of the female staff is residing beside sisters' community and nursing school students. The work is

in progress, we have constructed our wall in front of our hospital. We hope that gradually we shall be able to construct other sides too.

WASHING MACHINE: There was a need of washing Machine for our laundry. Our washing machine was very old and it was difficult to maintain it. Thus, with your support we have purchased a good washing Machine. This washing machine is serving the purpose of Landry. Thank you for your generosity.

OUR NURSING SCHOOL:

In our academic field we have progressed well. Our nursing students have made us proud of our institutes. Beside their academic performance they contribute a lot in their extracurricular activities of the school and institute. They put up lots of skits and make people aware of bad habits

and how to live a healthy life in our surrounding. We are glad that they also performed well in their final examination. Last year, we had couple of failures but this academic year all students have passed with good percentage. Two of our students secured Distinction and others First class and Second class. We are grateful to you for empowering our poor students with confidence. Surely we hope that they will dream high and live a dignified life with moral values.

CHRISTMAS IS A JOYFUL EXPERIENCE for each one of us. This joy comes from God and when we share this joy with others generously. Our life is enjoyable, we enjoy our mission, and our attitudes are transformed by the joy of our sharing. Sharing our joys has enhanced our atmosphere. My heart experiences that joy which have enable me to share life, life that affirms and enhances life. I am grateful to you for your constant help and support during this year.

I assure you that I shall keep you and your family members in my prayers. I pray that this Christmas, the new born Baby may bring peace, joy and love in your family and your mission may yield a good fruits. God Bless you all. Kindly do keep me and our community, staff, Students and patients in your prayers.

With gratitude, love and prayers

Sr. Hilda, MMSI
